P.A. SOUND APPLICATION FOR SMALL CONCERTS AND INTIMATE VENUES

So you've got a gig but you don't have a sound system? Hmmm! Well let me guess, you're going to jump in your car to hire one, drive back home, go to the gig, set all the gear up, play, pack all the P.A. gear away after the gig, lug it into the car drive home, unpack it, then load the car up again next day to take it all back and then finally you get to go back home? Phew! Believe me guys I know where you're coming from!

If you're a solo performer, duo or trio and the above scenario is applicable to you, then why not consider the benefits of all the 'behind the scenes' stuff being done for you! Here's what we do! A small P.A. system, microphones and stands along with a cd player are all supplied, I stay and mix the entire show for you then pack all the gear away at the end! All you do is....Unplug! You get to concentrate on your performance in the knowing that at the conclusion of the show, that's it, all's done....Ah relax!

WE PROVIDE THE LOT AND WE DO THE LOT!

Why not call and discuss your needs for your next performance?
